ABOUT ME

Dynamic Software Developer with 2+ years of experience architecting full-stack solutions using Ruby on Rails, Tailwind, and JavaScript. Skilled at crafting high-performance APIs backed by PostgreSQL, Elasticsearch, and Redis, and automating CI/CD pipelines on AWS. Strong advocate for test-driven development with RSpec, adept at debugging production issues, and passionate about mentoring peers and driving agile best practices to deliver reliable, user-centric applications.

EDUCATION

2019 - 2023

Anjuman Collage of Engineering and Technology

Bechlar of Engineering

Computer Science and Engineering

SKILLS

Languages - Ruby, Ruby on Rails7, HTML CSS, Bootstrap, Tailwind

Database-Postgres, MySql

IDE - Visual Studio Code,Sublime

Server- Heroku, AWS Relevant Exp- 2 years

other - Restful APIs, Third Party integration, OOPS, MVC, ORM, Redis, Micro-services, RSpec, Elasticsearch

WORK EXPERIENCE

Shadbox Infosystem Pvt Ltd

Jr Software Developer

Architected and deployed Rails-based backend services powering Shadbox's e-commerce platform. Built an ActiveAdmin interface to manage product catalogs (T-shirts, hats, accessories). Integrated Sentry for real-time error tracking and AWS S3 for secure file uploads. Documented and maintained API specs via Swagger; wrote custom Rake tasks for reporting. Ensured code quality through comprehensive RSpec suites and CI/CD checks.

MAJOR PROJECT DETAILS

Project: Shadbox Backend API (<https://app.shadbox.com>)

Description:

- Designed secure, versioned RESTful APIs (/api/v1/...) with Devise-JWT authentication.
- Developed endpoints for blogs, services, 'Hire Us,' comments (nested), and contact forms.
- Employed ActiveModel Serializers for clean JSON output and robust error-handling.
- Enabled CORS and validated key user flows through RSpec integration tests.

PROJECT: Turfly (<https://turfly.co>)

Description:

- Built a platform to list/manage turf-rental businesses with multi-role support (owners, admins, end-users).
- Implemented turf listings, availability calendars, booking workflows, and admin, dashboards.
- Turfly is a platform designed to manage and promote turf businesses by providing an easy-to-use interface for clients (turf owners), their administrators/managers, and end-users
- It enables clients to manage listings, bookings, transactions, and promotional activities

PROJECT: WildTribute (<https://wildtribute.herokuapp.com/>)

Description:

- Enhanced production app: added new features, fixed bugs, and maintained deployment pipelines.
- Led a team of 2 junior developers; facilitated sprint planning and requirement gathering.
- Integrated third-party services (Segment analytics, SendGrid emails, Stripe payments).

HOBBIES & INTERESTS

- Playing & watching football
- Listening to Ghazals
- Traveling
- Bike Riding
